This Clinical Guideline shall be reviewed periodically and updated consistent with the requirements established by the Board of Directors, Care Compass Network’s senior management, Federal and State law(s) and regulations, and applicable accrediting and review organizations.

Requirements for Behavioral Health Screening Tools

1. The screening tool must be **evidenced-based**, meaning that the tool must be derived or informed by objective evidence.
2. The screening tool must be **validated**, meaning that it has a reasonable level of sensitivity and specificity.
3. The screening tool must be **peer reviewed**.
4. The screening tool should cover areas recommended or required by:
 - Joint Commission
 - American Psychiatry Association
 - US Preventative Taskforce
 - SAMSHA
 - OMH
5. The screening tool should be comprehensive, identify multiple levels of severity, and screen for one or more from the following list:
 - Depression/Anxiety
 - Psychosis
 - Suicide
 - Violence
 - Work/school functioning
 - Alcohol/substance use
 - Trauma
 - Sexuality
 - Family
 - Physical
 - Nutrition/Eating
